SUBJECT FOR VOLUME 57, 1983

A

Absorption
The, distribution and excretion of anabolic agents, 233
Acids, volatile fatty
And the role of the large intestine in the control of feed intake in ponies, 815
Adipose tissue cellularity
Effect of cattle type and energy intake on carcass traits and, 621
Adrenocorticotropin, administration of
Serum cortisol and progesterone after, and(or) prolactin to sheep, 1525
Agarose isoelectric focusing
Thin-layer,: An improved technique for determining sheep hemoglobin type, 559
Age
Effects of maternal dietary restriction during gestation and lactation, muscle, sex and, on various indices of skeletal muscle growth in the rat, 328
Age, effect of
And glucocorticoid administration on the proteolytic activity of gastric mucosa: A comparative study in the young rat, calf and piglet, 74
Age-related alterations in thyroid hormone
Binding properties of porcine skeletal muscle cytosol, 1449
Alcohol treatments, effects of
On utilization of soybean meal by lambs and chicks, 511
Alfalfa hay
Plasma clearance of L- and D-lactate in steers fed, or high concentrate diets, 1029
Alfalfa nitrogen, dehydrated
Digestibility and rumen escape of soybean meal, blood meal, meat and bone meal and, 1037
Amino acids
Digestibility of nitrogen and, in soybean products for pigs, 373
The effect of gastric loads of sugars and, on milk intake of suckling pigs, 413
Ammonium polyphosphate
Versus dicalcium phosphate as a phosphorus supplement for growing-finishing swine, 632
Anabolic agents
Metabolism of endogenous and exogenous, in cattle, 226
The absorption, distribution and excretion of, 233
Animal experiments
Analysis of repeated measurements from, using polynomial regression, 765
Antral follicles, large
Growth and differentiation of, after spontaneous luteolysis in heifers: Changes in concentration of hormones in follicular fluid and specific binding of gonadotropins to follicles, 157
Arginine
Requirement of the young pig, 402
Arginine, effects of excess
On swine growth and plasma amino acid levels, 99
Awards
American Society of Animal Science, 1651
Block and Bridle
1983 Outstanding Senior, 1671
Midwestern Section ASAS
1983 Younger Animal Scientist Extension, 262
1983 Younger Animal Scientist Research, 261
1983 Younger Animal Scientist Teaching, 260
Northeast Section ADSA-ASAS
1983 Young Scientist, 782
Northeastern Section ASAS
1983 Distinguished Service, 781
Southern Section ASAS
1983 Distinguished Service, 256
1983 Extension, 257
Retired members and graduate student winners, 259
1983 Young Animal Scientist, 258
Western Section ASAS
1983 Distinguished Service, 1048
1983 Young Scientist, 1049
Undergraduate Scholarship Medals, 263

B

Backfat thickness of swine
Estimates of genetic parameters for growth rate and, tested to 105 and 135 kg, 879
Beans (phaseolus vulgaris)
Extruded mixtures of, and soybeans as protein sources in barley-based swine diets, 296
Beef
Dairy and beef × dairy carcass characteristics, 1440
Beef bulls, young
The effect of rearing environment on sexual behavior of, 1084
Beef, carcass and palatability characteristics of
Produced on pasture, corn silage and corn grain, 791
Beef carcass evaluation
By use of a video image analysis system, 908
Beef carcass traits
Individual and maternal genetic effects for, of breeds representing diverse biological types (Cycle I), 1124
Beef carcasses
Effects of trimming external fat from, on the accuracy of determining USDA yield grade, 349
Electrical stimulation and carcass aging effects on, in relation to postmortem glycolytic rates, 1456
Beef heifers
Growth and reproductive traits in, implanted with zeranol, 527
Beef production, life cycle efficiency of
I. Cow efficiency ratios for progeny weaned, 832

II. Relationship of cow efficiency ratios to traits of the dam and progeny weaned, 852
Behavior
And performance of pigs grouped by three different methods at weaning, 1406
Bentonite, role of
In prevention of T-2 toxicosis in rats, 1498
Boars
Restricted energy and elevated calcium and phosphorus intake for, during growth. I. Feedlot performance and bone characteristics, 82
Restricted energy intake and elevated calcium and phosphorus intake for, during growth. II. Foot and leg measurements and toe and soundness scores, 1182
Boars, growing
The effects of level of crude protein on performance of, 364
Boars, puberal
Breed and heterosis effects on testicular development and endocrine function of, 425
Body composition
A comparison of methods for estimating carcass and empty, in swine from birth to 145 kg, 55
Changes in swine, from birth to 145 kg, 43
Effect of production systems on performance, and lipid and mineral profiles of soft tissue in cattle, 1020
Effects of pregnancy and lactation on the, of first-litter female swine, 594
Efficacy of deuterium oxide to estimate, of growing swine, 66
Evaluation of ground carcass, sawdust residue and specific gravity methods for estimating, of reproducing swine, 604
Fetuses of lean and obese swine in late gestation:, plasma hormones and muscle development, 609
The effects of undernutrition of suckled pigs on subsequent growth and, after nutritional rehabilitation, 34
Body growth
Growth hormone, prolactin and puberty response to photoperiod and plane of nutrition in Holstein heifers, 892
Body weight
A Monte-Carlo comparison of estimators of average daily gain in, 885
Bone characteristics
Restricted energy and elevated calcium and phosphorus intake for boars during growth. 1. Feedlot performance and, 82
Bovine conceptus
Inhibitory effect of the, on lymphocyte stimulation, 456
Bovine follicular fluid, charcoal-treated
Effect of, on secretion of LH and FSH in ovariectomized heifers, 1517
Bovine males
Effects of late castration and zeranol on feedlot performance and carcass characteristics, 286
Bovine oocytes
In vitro fertilization of, by spermatozoa capacitated in vitro, 1001
Bovine serum albumin
Effect of, concentration on the development of ovine embryos in vitro, 466
Breeding, Quarter Horse
Pedigree analysis of four decades of, 585
Bull performance
Factors influencing individual, in central test stations, 1059
Bulls, dairy
Relationships of predicted differences of, and the performance of their crossbred progeny, 1133
Bulls, double-muscled
Plasma testosterone and LH responses to LHRH in, treated with trenbolone acetate and zeranol, 1138
Bulls, Holstein
Changes in the pituitary-gonadal axis associated with puberty in, 433
Bulls:, ralgro-implanted
Performance, carcass characteristics, longissimus palatability and carcass electrical stimulation, 355

C

Calcium
Phosphorus in swine. VI. Utilization of nitrogen, and phosphorus and reproductive performance of gravid gilts fed two dietary phosphorus levels for five parities, 1463
Restricted energy and elevated, and phosphorus intake for boars during growth. 1. Feedlot performance and bone characteristics, 82
Calcium, balance and urinary excretion of
Magnesium and phosphorus in response to high concentrate feeding and lactate infusion in lambs, 1306
Calcium, elevated
Restricted energy intake and, and phosphorus intake for boars during growth. II. Foot and leg measurements and toe and soundness scores, 1182
Restricted energy intake and, and phosphorus intake for gilts during growth. IV. Characterization of metacarpal, metatarsal, femur, humerus and turbinate bones of sows during three parities, 1200
Calcium level
Phosphorus bioavailability in the chick: Effects of protein source and, 1173
Calf
Effect of age and glucocorticoid administration on the proteolytic activity of gastric mucosa: A comparative study in the young rat, and piglet, 74
Calf removal
Pituitary and ovarian responses to gonadotropin releasing hormone, and progestogen in anestrous beef cows, 418
Calving date
Versus calving interval as a reproductive measure in beef cattle, 1412
Calving interval
Calving date versus, as a reproductive measure in beef cattle, 1412
Captive bolt stunning
Effect of delayed bleeding after, on heart activity and blood removal in beef cattle, 628

Carcass aging effects
Electrical stimulation and, on beef carcasses in relation to postmortem glycolytic rates, 1456
Carcass characteristics
And palatability characteristics of beef produced on pasture, corn silage and corn grain, 791
Beef, dairy and beef X dairy, 1440
Effects of late castration and zeranol on feedlot performance and, of bovine males, 286
Ralgro-implanted bulls: Performance, longissimus palatability and carcass electrical stimulation, 355
Carcass composition
Methods of estimating live animal and, 1316
Carcass electrical stimulation
Ralgro-implanted bulls: Performance, carcass characteristics, longissimus palatability and, 355
Carcass traits
Effect of cattle type and energy intake on, and adipose tissue cellularity, 621
Carcass weight
Changes in, and characteristics with increasing weight of large and small cattle, 1154
Castration
Effects of late, and zeranol on feedlot performance and carcass characteristics of bovine males, 286
Cattle
Impact of weighing procedures and variation in protein degradation rate on measured performance of growing lambs and, 1276
Lipolysis in subcutaneous adipose tissue from, varying in frame size and length of time on a finishing diet, 343
Metabolism of endogenous and exogenous anabolic agents in, 226
Wheat pasture poisoning. II Tissue composition of, grazing cereal forages and related to tetany, 1364
Cattle, beef
Calving date versus calving interval as a reproductive measure in, 1412
Condensed molasses solubles, corn steep liquor and fermented ammoniated condensed whey as protein sources for grazing dormant native range, 542
Effect of delayed bleeding after captive bolt stunning on heart activity and blood removal in, 628
Use of computers in, research, extension and teaching programs, 771
Cattle, calcium-binding protein in
Studies of, 966
Cattle, growing and finishing
Effect of diet grain content on performance of, 717
Cattle, Hereford
Comparison of two- and three-way rotational crossing and synthetic variety production involving inbred lines of,: Postweaning traits, 577
Cattle, large and small
Changes in carcass weight and characteristics with increasing weight of, 1154
Changes in primal cut yield with increasing weight of, 1166
Cattle, performance of growing
Effects of 4,4^1-dimethyldiphenyliodonium chloride on, 201
Cattle, postpartum dairy
Alteration of the GnRH-induced LH release by steroids in, 1251
Cattle, soft tissue in
Effect of production systems on performance, body composition and lipid and mineral profiles of, 1020
Cattle, wheat straw diets in
Effect of dietary crude protein on the dry matter digestibility of, 1568
Cell wall phenolics
Simple phenolic monomers of forages and effects of in vitro fermentation on, 1294
Cereal pastures
Wheat pasture poisoning. I An evaluation of, as related to tetany in beef cows, 1352
Chemical treatments, effects of
Feather and hair meals for ruminants. IV., of feathers and processing time on digestibility, 495
Chick
Phosphorus bioavailability in the,: Effects of protein source and calcium level, 1173
Chicks
Effects of alcohol treatments on utilization of soybean meal by lambs and, 511
Growth and in vitro protein synthesis in two strains of, 320
Chlortetracycline
Effect of feeding, or virginiamycin on shedding of salmonellae from experimentally infected swine, 279
Chlortetracycline, therapeutic and subtherapeutic concentrations of
Multiple antibiotic resistance in fecal, cecal and colonic coliforms from pigs fed, 1225
Coccidia and roundworms
Effects of low-level infections by, on the nutritional status of rats fed an adequate diet, 1487
Computers
Use of, in beef cattle research, extension and teaching programs, 771
Corn
Vomitoxin in, fed to young pigs, 655
Corn, normal and opaque-2
Effects of soil nitrogen fertility on the protein and lysine content and nutritional value of, 1345
Corn silage
Predicting net energy value of, varying in grain content, 710
Corn steep liquor
Condensed molasses solubles, and fermented ammoniated condensed whey as protein sources for beef cattle grazing dormant native range, 542
Cortisol
Effects of storage times and temperatures on T_3, T_4, LH prolactin, insulin, and progesterone concentrations in blood samples from cows, 683
Cow
Life cycle efficiency of beef production: I., efficiency ratios for progeny weaned, 832
Life cycle efficiency of beef production: II. Relationship of, efficiency ratios to traits of the dam and progeny weaned, 852
Nursing enhances the negative effect of estrogen on LH release in the, 1530

Cows
Effects of storage times and temperatures on T_3, T_4, LH, prolactin, insulin, cortisol and progesterone concentrations in blood samples from, 683
Reproductive performance of Gyr,: The effect of weaning age of calves and postpartum energy intake, 807
Role of adrenergic receptors in mediating estradiol-17β-stimulated increases in uterine blood flow of, 665
Cows, anestrous beef
Pituitary and ovarian responses to gonadotropin releasing hormone, calf removal and progestogen in, 418
Cows, Angus and Hereford
Matrilinear social dominance and spatial relationships among, 1397
Cows, beef
Wheat pasture poisoning. I. An evaluation of cereal pastures as related to tetany in, 1352
Cows, Holstein
Comparison of different patterns of exogenous growth hormone administration on milk production in, 699
Influence of the ovary on estradiol-induced luteinizing hormone release in postpartum milked and suckled, 692
Cows, spring-calving
Supplemental feeding of, on tall fescue or tall fescue-red clover pastures, 535
Crossbred gilts
Reciprocal recurrent selection for 21-day litter weight of, I. Selection applied and genetic change in reproduction of crossbred gilts, 1418
Reciprocal recurrent selection for 21-day litter weight of, II. Reproductive performance of purebred females producing purebred and two-way cross litters and performance of purebred and crossbred pigs, 1431

D

Dairy
Beef, and beef X dairy carcass characteristics, 1440
Deuterium oxide
Efficacy of, to estimate body composition of growing swine, 66
Diaryliodonium chemicals
Effects of, on nitrogen utilization in growing steers, 195
Effects of, on rumen fermentation in vitro and in vivo, 186
Dicalcium phosphate
Ammonium polyphosphate versus, as a phosphorus supplement for growing-finishing swine, 632
Dichlorvos, effects of
On lymphocyte reactivity during pregnancy in the pig, 1270
Diet, corn-soybean meal
Effects of pelleting conditions on performance of pigs fed a, 922
Diet, cracked corn-silage
Monensin effects on digestibility, methanogenesis and heat increment of a, fed to steers, 168
Diet grain content
Effect of, on performance of growing and finishing cattle, 717
Diet, high grain
Effect of monensin on total volatile fatty acid production by steers fed a, 178
Dietary crude protein
Effect of, on the dry matter digestibility of wheat straw diets in cattle, 1568
Dietary ingredient
The effects of, sex and slaughter weight on cooked meat flavor profile of market lamb, 1146
Dietary zinc
Concentration of minerals in tissues of pigs from dams fed different levels of, 130
Diets
Feather and hair meals for ruminants. III. Relationship between enzymatic or in vitro rumen digestibility and in vivo digestibility of, containing feather and hair meals, 483
Diets, fescue-corn stillage
The effect of sodium hydroxide treatment of, on intake, digestibility and performance with lambs, 1013
Diets, finishing steer
Corn particle size mixtures, roughage level and starch utilization in, 739
Diets, normal and high fiber
Maternal performance of Duroc, Hampshire and Landrace back-cross gilts fed, during postweaning growth, 565
Digestibility
And metabolism of mature tall fescue hay reconstituted and ensiled with whole stillage, 1286
Feather and hair meals for ruminants. IV. Effects of chemical treatments of feathers and processing time on, 495
Monensin effects on, methanogenesis and heat increment of a cracked corn-silage diet fed to steers, 168
Digestibility and rumen escape
Of soybean meal, blood meal, meat and bone meal and dehydrated alfalfa nitrogen, 1037
Digestibilities, dietary component
A study of the relationship between performance and, by swine fed different levels of dietary fiber, 645
Digestion studies
Lignin as a marker in,: A review, 220
Distribution
The absorption, and excretion of anabolic agents, 233
Doe reproduction
And preweaning litter performance of straightbred and crossbred rabbits, 1090
Dolomitic limestone
Effect of supplemented magnesium from magnesium oxide or, upon digestion and absorption of minerals in sheep, 1545
Dopamine
Effects of ovarian secretions and, on secretion of luteinizing hormone and prolactin in ewes, 978
Duroc
Maternal performance of, Hampshire and Landrace backcross gilts fed normal and high fiber diets during postweaning growth, 565
Dystocia in Charolais heifers
Factors affecting and prediction of, 1084

E

E. coli growth
In serum of iron dextran-supplemented pigs, 387
Electrical stimulation
And carcass aging effects on beef carcasses in relation to postmortem glycolytic rates, 1456
Endocrine function
Breed and heterosis effects on testicular development and, of puberal boars, 425
Energy, restricted
And elevated calcium and phosphorus intake for boars during growth. 1. Feedlot performance and bone characteristics, 82
Environmental stress
And the physiology, performance and health of ruminants, 1584
Epinephrine, effect of
Norepinephrine and(or) GnRH on Serum LH in prepuberal beef heifers, 706
Equation, use of the selected
Choice of a prediction equation and the, in subsequent experimentation, 1328
Equine digestive tract
Nitrogen partitioning along the, 943
Errata, 277, 1343
Estimating carcass, methods for
A comparison of, and empty body composition in swine from birth to 145 kg, 55
Estradiol
Luteinizing hormone, follicle stimulating hormone and prolactin secretion in ewes and wethers after zeranol or, injection, 443
prepuberal beef heifers, 706
Estradiol-17β-stimulated increases
Role of adrenergic receptors in mediating, in uterine blood flow of cows, 665
Estrogen injection
Comparison of intrauterine and subcutaneous sites of, for luteal maintenance in swine, 146
Estrogen, negative effect of
Nursing enhances the, on LH release in the cow, 1530
Estrogens, endogenous
Residue levels of, in beef tissues, 247
Estrous cycle
Pituitary-ovarian relationships during the, and the influence of parity in an inbred strain of miniature swine, 1517
Ewe
Luteal phase insufficiency in the, as a consequence of premature induction of ovulation by intrafollicular injection of gonadotropins, 1507
Pregnancy diagnosis in the, 1
Ewes
Effects of ovarian secretions and dopamine on secretion of luteinizing hormone and prolactin in, 978
Effects of vitamin E and selenium injections on reproduction and preweaning lamb survival in ewes consuming diets marginally deficient in selenium, 553
Luteinizing hormone, follicle stimulating hormone and prolactin secretion in, and wethers after zeranol or estradiol injection, 443
Ewes, autumn-lambing
Effect of suckling on postpartum changes in 13,14-dihydro-15-keto-PGF$_2\alpha$ and progesterone and induced release of gonadotropins in, 673
Excretion
The absorption, distribution and, of anabolic agents, 233
Exogenous growth hormone administration
Comparison of different patterns of, on milk production in Holstein cows, 699
Exsanguination
Effects of stunning method and time interval from stunning to, on blood splashing in pork, 918
Extensor digitorum longus muscles
Satellite cell and myonuclei populations in rat soleus and, after maternal nutritional deprivation and realimentation, 1618
Extrusion cooking
Effects of steam pelleting conditions and, on a swine diet containing wheat middlings, 929

F

Farm animals
Stress in,: A need for reevaluation, 6
Feather and hair meals
For ruminants. II. Comparative evaluation of feather and hair meals as protein supplements, 473
For ruminants. III. Relationship between enzymatic or in vitro rumen digestibility and in vivo digestibility of diets containing feather and hair meals, 483
For ruminants. IV. Effects of chemical treatments of feathers and processing time on digestibility, 495
Feed intake, control of
Volatile fatty acids and the role of the large intestine in the, in ponies, 815
Feedlot performance
Effects of late castration and zeranol on, and carcass characteristics of bovine males, 286
Fermentation, effects of in vitro
Simple phenolic monomers of forages and, on cell wall phenolics, 1294
Fertilization, in vitro
Of bovine oocytes by spermatozoa capacitated in vitro, 1001
Of ovulated and ovarian ovine oocytes, 1006
Fescue (festuca arundinacea schreb.)
Nutritional value and voluntary intake of tall, fed to sheep, 1383
Fescus hay
Digestibility and metabolism of mature tall, reconstituted and ensiled with whole stillage, 1286
Fiber, dietary
A study of the relationship between performance and dietary component digestibilities by swine fed different levels of, 645
Follicle stimulating hormone
Luteinizing hormone, and prolactin secretion in ewes and wethers after zeranol or estradiol injection, 443
Follicular fluid
Growth and differentiation of large antral follicles after spontaneous luteolysis in heifers: Changes in concentration of hormones in, and specific binding of gonadotropins to follicles, 157
Forages
Simple phenolic monomers of, and effects of in

vitro fermentation on cell wall phenolics, 1294
Four, 4′-dimethyldiphenyliodonium chloride
Effects of, on performance of growing cattle, 201
FSH, secretion of LH and
Effect of charcoal-treated bovine follicular fluid on, in ovariectomized heifers, 1512

G

Genetic and phenotypic parameters
Estimated from Nebraska specific-pathogen-free swine field records, 1117
Genetic effects, individual and maternal
For beef carcass traits of breeds representing diverse biological types (Cycle I), 1124
Genetic parameters
Estimates of, for growth rate and backfat thickness of swine tested to 105 and 135 kg, 879
Gilt
Effect of dietary zinc levels on the growth and development of the, 106
Gilt, prepubertal
Relationship between number of induced ovulations in the, to the level of progesterone and to the number of spontaneous postpubertal ovulations, 1260
Gilts
Effect of dietary zinc levels on health and productivity of, and sows through two parities, 114
Restricted energy intake and elevated calcium and phosphorus intake for, during growth. IV. Characterization of metacarpal, metatarsal, femur, humerus and turbinate bones of sows during three parities, 1200
Gilts, Landrace backcross
Maternal performance of Duroc, Hampshire and, fed normal and high fiber diets during postweaning growth, 565
Gilts, puberty in
Influence of supplemental lighting during periods of increasing or decreasing daylength on the onset of, 1235
Glucocorticoid administration
Effect of age and, on the proteolytic activity of gastric mucosa: A comparative study in the young rat, calf and piglet, 74
GnRH
Effect of epinephrine, norepinephrine and(or), on serum LH in prepuberal beef heifers, 706
Gonadotropin releasing hormone
Pituitary and ovarian responses to, calf removal and progestogen in anestrous beef cows, 418
Gonadotropins
Growth and differentiation of large antral follicles after spontaneous luteolysis in heifers: Changes in concentration of hormones in follicular fluid and specific binding of, to follicles, 157
Gonadotropins, induced release of
Effect of suckling on postpartum changes in 13,14-dihydro-15-keto-$PGF_2\alpha$ and progesterone and, in autumn-lambing ewes, 673
Gonadotropins, intrafollicular injection of
Luteal phase insufficiency in the ewe as a consequence of premature induction of ovulation by, 1507
Grain content
Predicting net energy value of corn silage varying in, 710
Grains, wet distillers
Preservation of, and its value as a protein source for growing ruminants, 729
Growth
And in vitro protein synthesis in two strains of chicks, 320
Growth hormone
Temporal patterns of, prolactin and thyrotropin secretion in Targhee rams selected for rate and efficiency of gain, 338
Body growth, prolactin and puberty response to photoperiod and plane of nutrition in Holstein heifers, 892
Growth, postweaning
Maternal performance of Duroc, Hampshire and Landrace backcross gils fed normal and high fiber diets during postweaning growth, 565
Growth rate of swine
Estimates of genetic parameters for, and backfat thickness of swine tested to 105 and 135 kg, 879

H

Halothane reaction in pigs
Further evidence on the inheritance of, 826
Health of ruminants
Environmental stress and the physiology, performance and, 1584
Heart activity
Effect of delayed bleeding after captive bolt stunning on, and blood removal in beef cattle, 628
Heifers
Growth and differentiation of large antral follicles after spontaneous luteolysis in,: Changes in concentration of hormones in follicular fluid and specific binding of gonadotropins to follicles, 157
Heifers, Charolais
Factors affecting and prediction of dystocia in, 1077
Heifers, Holstein
Body growth, growth hormone, prolactin and puberty response to photoperiod and plane of nutrition in, 892
Heifers, ovariectomized
Effect of charcoal-treated bovine follicular fluid on secretion of LH and FSH in, 1512
Heifers, prepuberal beef
Effect of epinephrine, norepinephrine and(or) GnRH on serum LH in, 706
Heifers, puberty of
Photoperiod influences age at, 985
Heterosis effects
Breed prenatal, breed postnatal and, for postweaning traits in swine, 313
Hormones, anabolic sex
Application of radioimmunoassay (RIA) for the determination of residues of, 239
Hormones, pituitary and adrenal
Serum concentrations of, in female pigs exposed to two photoperiods, 1243
Human chorionic gonadotropin treatment
Changes in plasma estrogen luteinizing hormone, follicle-stimulating hormone and 13,14-dihydro-

15-keto-prostaglandin $F_2\alpha$ during blockade of luteolysis in pigs after, 993
Hysterectomy, response to
First luteal tissue in ewe lambs: Influence on subsequent ovarian activity and, 150

I

Indiangrass
Rumen microbial degradation of, and big bluestem leaf blades, 1616
Inseminations
Seasonal effects of PMSG and number of, on fertility of progestogen-treated sheep, 307
Insulin
Effects of storage times and temperatures on T_3, T_4, LH, prolactin, cortisol and progesterone concentrations in blood samples from cows, 683
Intrafollicular injection of gonadotropins
Luteal phase insufficiency in the ewe as a consequence of premature induction of ovulation by, 1507
Intraruminal activity
Laidlomycin butyrate – An ionophore with enhanced, 1553
Ionophore
Laidlomycin butyrate – An, with enhanced intraruminal activity, 1553
Iron dextran-supplemented pigs
E. coli growth in serum of, 387
Iron, parenteral
Effect of, on serum electrolytes of the baby pig, 638

L

Lactate infusion in lambs
Balance and urinary excretion of calcium, magnesium and phosphorus in response to high concentrate feeding and, 1306
Lactation
A comparison of an 8- versus 16-hour photoperiod during, on suckling frequency of the baby pig and maternal performance of the sow, 292
Effects of pregnancy and, on the body composition of first-litter female swine, 594
Laidlomycin butyrate
–An ionophore with enhanced intraruminal activitiy, 1553
Lamb survival
Effects of vitamin E and selenium injections on reproduction and preweaning, in ewes consuming diets marginally deficient in selenium, 553
Lambs
Balance and urinary excretion of calcium, magnesium and phosphorus in response to high concentrate feeding and lactate infusion in, 1306
Effects of alcohol treatment on utilization of soybean meal by, and chicks, 511
Effects of thyrotropin-releasing hormone and a thyrotropin releasing hormone analog on growth and selected plasma hormones in, 139
Impact of weighing procedures and variation in protein degradation rate on measured performance of growing, and cattle, 1276
The effect of sodium hydroxide treatment of fescue-corn stillage diets on intake, digestibility and performance with, 1013
Lambs, ewe
First luteal tissue in,: Influence on subsequent ovarian activity and response to hysterectomy, 150
Lasalocid, protein source and
Effect of, on nitrogen digestibility and growth by ruminants, 1537
Leaf blades, big bluestem
Rumen microbial degradation of Indiangrass and, 1626
LH
Effects of storage times and temperatures on T_3, T_4, prolactin, insulin, cortisol and progesterone concentrations in blood samples from cows, 683
Plasma testosterone and, responses to LHRH in double-muscled bulls with trenbolone acetate and zeranol, 1138
LH release
Alteration of the GnRH-induced, by steroids in postpartum dairy cattle, 1251
LH release in the cow
Nursing enhances the negative effect of estrogen on, 1530
LH, secretion of
Effect of charcoal-treated bovine follicular fluid on, and FSH in ovariectomized heifers, 1512
LH, serum
Effect of epinephrine, norepinephrine and(or), in prepuberal beef heifers, 706
LHRH
Plasma testosterone and LH responses to, in double-muscled bulls treated with trenbolone acetate and zeranol, 1138
Lighting, supplemental
Influence of, during periods of increasing or decreasing daylength on the onset of puberty in gilts, 1235
Lignin
Nutritional implications of phenolic monomers and,: A review, 206
Lignin as a marker
In digestion studies: A review, 220
Lipolysis
In subcutaneous adipose tissue from cattle varying in frame size and length of time on a finishing diet, 343
Litter growth, postweaning
Breed, heterotic and diet effects on, and mortality in rabbits, 1108
Litter performance, preweaning
Doe reproduction and, of straightbred and crossbred rabbits, 1090
Litter sizes
Effect of teat number, teat abnormalities and underline length on, and weights at 21 and 42 days in swine, 802
Litter weight, 21-day
Reciprocal recurrent selection for, of crossbred gilts. I. Selection applied and genetic change in reproduction of crossbred gilts, 1418
Reciprocal recurrent selection for, of crossbred gilts. II. Reproductive performance of purebred females producing purebred and two-way cross litters and performance of purebred and cross-

bred pigs, 1431
Longissimus palatability
Ralgro-implanted bulls: Performance, carcass characteristics, and carcass electrical stimulation, 355
Luteal maintenance
Comparison of intrauterine and subcutaneous sites of estrogen injection for, in swine, 146
Luteal phase insufficiency
In the ewe as a consequence of premature induction of ovulation by intrafollicular injection of gonadotropins, 1507
Luteal tissue
First, in ewe lambs: Influence on subsequent ovarian activity and response to hysterectomy, 150
Luteinizing hormone
Effects of ovarian secretions and dopamine on secretion of, and prolactin in ewes, 978
Follicle stimulating hormone and prolactin secretion in ewes and wethers after zeranol or estradiol injection, 443
Luteinizing hormone, estradiol-induced
Influence of the ovary on, release in postpartum milked and suckled Holstein cows, 692
Luteolysis in pigs
Changes in plasma estrogen, luteinizing hormone, follicle-stimulating hormone and 13,14-dihydro-15-keto-prostaglandin $F_2\alpha$ during blockade of, after human chorionic gonadotropin treatment, 993
Lymphocyte reactivity
Effects of dichlorvos on, during pregnancy in the pig, 1270
Lymphocyte stimulation
Inhibitory effect of the bovine conceptus on, 456
Lysine content, protein and
Effects of soil nitrogen fertility on the, and nutritional value of normal and opaque-2 corn, 1345

M

Magnesium
Site of, and other macromineral absorption in steers fed high levels of potassium, 503
Magnesium, balance and urinary excretion of
Calcium, and phosphorus in response to high concentrate feeding and lactate infusion in lambs, 1306
Magnesium oxide
Effect of supplemented magnesium from, or dolomitic limestone upon digestion and absorption of minerals in sheep, 1545
Influence of sodium bicarbonate and, on digestion and metabolism in yearling beef steers abruptly changed from high forage to high energy diets, 1561
Market lamb
The effects of dietary ingredient, sex and slaughter weight on cooked meat flavor profile of, 1146
Maternal dietary restriction, effects of
During gestation and lactation, muscle, sex and age on various indices of skeletal muscle growth in the rat, 328
Maternal nutritional deprivation
Satellite cell and myonuclei populations in rat soleus and extensor digitorum longus muscles after, and realimentation, 1618
Maternal performance
A comparison of an 8- versus 16-hour photoperiod during lactation on suckling frequency of the baby pig and, of the sow, 292
Of Duroc, Hampshire and Landrace backcross gilts fed normal and high fiber diets during postweaning growth, 565
Over three parities in rats selected for rate or efficiency of protein gain, 19
Matrilinear social dominance
and spatial relationships among Angus and Hereford cows, 1397
Memorials, 519, 780
Metabolism
Digestibility and, of mature tall fescue hay reconstituted and ensiled with whole stillage, 1286
Skeletal muscle, in neonatal lean and obese pigs, 26
Methods of estimating live animal
And carcass composition, 1316
Milk intake
The effect of gastric loads of sugars and amino acids on, of suckling pigs, 413
Milk, mineral concentration in
Effect of dietary zinc levels on, 123
Milk production
Characterization of straightbred and crossbred rabbits for, and associative traits, 1100
Comparison of different patterns of exogenous growth hormone administration on, in Holstein cows, 699
Milk production, future improvement of
Potential for nutritional improvement, 750
Minerals, concentration of
In tissues of pigs from dams fed different levels of dietary zinc, 130
Molasses solubles, condensed
Corn steep liquor and fermented ammoniated condensed whey as protein sources for beef cattle grazing dormant native range, 542
Monensin
Effect of, on total volatile fatty acid production by steers fed a high grain diet, 178
Effects on digestibility, methanogenesis and heat increment of a cracked corn-silage diet fed to steers, 168
Protein levels and, for growing and finishing steers, 1067
Monte-Carlo comparison
A, of estimators of average daily gain in body weight, 885
Mucosa, gastric
Effect of age and glucocorticoid administration on the proteolytic activity of,: A comparative study in the young rat, calf and piglet, 74
Muscle
Effects of maternal dietary restriction during gestation and lactation, sex and age on various indices of skeletal muscle growth in the rat, 328
Muscle development
Fetuses of lean and obese swine in late gestation: Body composition, plasma hormones and, 609
Mycoplasmal pneumonia in swine
Tiamulin feed medication for the maintenance of weight gains in the presence of, 1474
Myonuclei populations in rat soleus
Sattelite cell and, and extensor digitorum longus muscles after maternal nutritional deprivation and realimentation, 1618

N

National Animal Agriculture Week, 1983
Presidential proclamation, vi
Nebraska
Genetic and phenotypic parameters estimated from, specific-pathogen-free swine field records, 1117
Net energy value
Predicting, of corn silage varying in grain content, 710
News and notes, 274, 520, 784, 1050, 1337, 1673
Niacin supplementation
Influence of, and nitrogen source on rumen microbial fermentation, 1576
Nitrogen digestibility
Effect of protein source and lasalocid on, and growth by ruminants, 1537
Nitrogen, digestibility of
And amino acids in soybean products for pigs, 373
Nitrogen partitioning
Along the equine digestive tract, 943
Nitrogen source
Influence of niacin supplementation and, on rumen microbial fermentation, 1576
Nitrogen utilization
Effects of diaryliodonium chemicals on, in growing steers, 195
Nitrogen, utilization of
Phosphorus in swine. VI. Calcium and phosphorus and reproductive performance of gravid gilts fed two dietary phosphorus levels for five parities, 1463
Norepinephrine
Effect of epinephrine, and(or) GnRH on serum LH in prepuberal beef heifers, 706
Nutrients, digestibility of
In raw and heated soyflakes for pigs, 1215
Nutritional rehabilitation
The effects of undernutrition of suckled pigs on subsequent growth and body composition after, 34

O

Oocytes, ovine
In vitro fertilization of ovulated and ovarian, 1006
Ovarian activity
First luteal tissue in ewe lambs: Influence on subsequent, and response to hysterectomy, 150
Ovarian secretions
Effects of, and dopamine on secretion of luteinizing hormone and prolactin in ewes, 978
Ovary, influence of the
On estradiol-induced luteinizing hormone release in postpartum milked and suckled Holstein cows, 692
Ovine embryos
Effect of bovine serum albumin concentration on the development of, in vitro, 466
Ovulations, induced
Relationship between number of, in the prepubertal gilt to the level of progesterone and to the number of spontaneous postpubertal ovulations, 1260
Ovulations, spontaneous postpubertal
Relationship between number of induced ovulations in the prepubertal gilt to the level of progesterone and to the number of, 1260

P

Palatability characteristics
Carcass and, of beef produced on pasture, corn silage and corn grain, 791
Parity, influence of
Pituitary-ovarian relationships during the estrous cycle and the, in an inbred strain of miniature swine, 1517
Pastures, tall fescue or tall fescue-red clover
Supplemental feeding of spring-calving cows on, 535
Pedigree analysis
Of four decades of Quarter Horse breeding, 585
Percentage muscle
Prediction of, in pork carcasses, 1392
Performance
A study of the relationship between, and dietary component digestibilities by swine fed different levels of dietary fiber, 645
Effect of a high fat supplement in late gestation and lactation on piglet survival and, 954
Effect of diet grain content on, of growing and finishing cattle, 717
Effect of dietary fat source and level on the, of neonatal and early weaned pigs, 936
Effect of production systems on, body composition and lipid and mineral profiles of soft tissue in cattle, 1020
Impact of weighing procedure and variation in protein degradation rate on measured, of growing lambs and cattle, 1276
Of growing and finishing steers fed roasted soybean meal, 1374
Of selected and control lines of Duroc and Yorkshire pigs and their reciprocal crossbred progeny, 867
Ralgro-implanted bulls:, carcass characteristics, longissimus palatability and carcass electrical stimulation, 355
Relationships of predicted differences of dairy bulls and the, of their crossbred progeny, 1133
The effects of level of crude protein on, of growing boars, 364
Performance, feedlot
Restricted energy and elevated calcium and phosphorus intake for boars during growth. 1., and bone characteristics, 82
Performance, maternal
Over three parities in rats selected for rate or efficiency of protein gain, 19
Performance of pigs
Behavior and, grouped by three different methods at weaning, 1406
Performance, reproductive
Of cows: The effect of weaning age of calves and postpartum energy intake, 807
Phenolic monomers
Nutritional implications of, and lignin: A review, 206
Simple, of forages and effects of in vitro fermentation on cell wall phenolics, 1294

Phenotypic parameters, genetic and
Estimated from Nebraska specific-pathogen-free swine field records, 1117
Phosphorus
Balance and urinary excretion of calcium, magnesium and, in response to high concentrate feeding and lactate infusion in lambs, 1306
Restricted energy and elevated calcium and, intake for boars during growth. 1. Feedlot performance and bone characteristics, 82
Phosphorus, availability of
Plasma alkaline phosphatase as a criterion for determining biological, for swine, 396
Phosphorus bioavailability
In the chick: Effects of protein source and calcium level, 1173
Phosphorus in swine
VI. Utilization of nitrogen, calcium and phosphorus and reproductive performance of gravid gilts fed two dietary phosphorus levels for five parities, 1463
Phosphorus intake for boars
Restricted energy intake and elevated calcium and, during growth. II. Foot and leg measurements and toe and soundness scores, 1182
Phosphorus intake for gilts
Restricted energy intake and elevated calcium and, during growth. IV. Characterization of metacarpal, metatarsal, femur, humerus and turbinate bones of sows during three parities, 1200
Phosphorus supplement
Ammonium polyphosphate versus dicalcium phosphate as a, for growing-finishing swine, 632
Phosphorus, utilization of
Phosphorus in swine. VI. Utilization of nitrogen, calcium and, and reproductive performance of gravid gilts fed two dietary phosphorus levels for five parities, 1463
Photoperiod
Influences age at puberty of heifers, 985
Photoperiods
Serum concentrations of pituitary and adrenal hormones in female pigs exposed to two, 1243
Pig
A comparison of an 8- versus 16-hour photoperiod during lactation on suckling frequency of the baby, and maternal performance of the sow, 292
Effects of dichlorvos on lymphocyte reactivity during pregnancy in the, 1270
Pig, baby
Effect of parenteral iron on serum electrolytes of the, 638
Pig, Duroc
Performance of selected and control lines of, and Yorkshire pigs and their reciprocal crossbred progeny, 867
Pig, Yorkshire
Performance of selected and control lines of Duroc and, and their reciprocal crossbred progeny, 867
Pig, young
Arginine requirement of the, 402
Piglet
Effect of age and glucocorticoid administration on the proteolytic activity of gastric mucosa: A comparative study in the young rat, calf and, 74
Piglet survival
Effect of a high fat supplement in late gestation and lactation on, and performance, 954
Piglets
Developmental changes in serum ferritin of, 960
Pigs
Digestibility of nitrogen and amino acids in soybean products for, 373
Digestibility of nutrients in raw and heated soyflakes for, 1215
E. coli growth in serum of iron dextran-supplemented, 387
Multiple antibiotic resistance in fecal, cecal and colonic coliforms from, fed therapeutic and subtherapeutic concentrations of chlortetracycline, 1225
Skeletal muscle metabolism in neonatal lean and obese, 26
Pigs, effects of pelleting conditions
On performance of pigs fed a corn-soybean meal diet, 922
Pigs, female
Serum concentrations of pituitary and adrenal hormones in, exposed to two photoperiods, 1243
Pigs, fetal and perinatal
Semitendinosis muscle development in several strains of, 1608
Pigs, halothane reaction in
Further evidence on the inheritance of, 826
Pigs, luteolysis in
Changes in plasma estrogen, luteinizing hormone, follicle-stimulating hormone and 13,14-dihydro-15-keto-prostaglandin $F_2\alpha$ during blockade of, after human chorionic gonadotropin treatment, 993
Pigs, neonatal and early weaned
Effect of dietary fat source and level on the performance of, 936
Pigs, performance of
Behavior and, grouped by three different methods at weaning, 1406
Pigs, purebred and crossbred
Reciprocal recurrent selection for 21-day litter weight of crossbred gilts. II. Reproductive performance of purebred females producing purebred and two-way cross litters and performance of, 1431
Pigs, suckled
The effects of undernutrition of, on subsequent growth and body composition after nutritional rehabilitation, 34
Pigs, suckling
The effect of gastric loads of sugars and amino acids on milk intake of, 413
Pigs, tissues of
Concentration of minerals in, from dams fed different levels of dietary zinc, 130
Pigs, young
Vomitoxin in corn fed to, 655
Pituitary-gonadal axis
Changes in the, associated with puberty in Holstein bulls, 433
Pituitary-ovarian relationships
During the estrous cycle and the influence of parity in an inbred strain of miniature swine, 1517
Placement, 276, 522, 786, 1053, 1340, 1676

Plasma alkaline phosphatase
As a criterion for determining biological availability of phosphorus for swine, 396
Plasma amino acid
Effects of excess arginine on swine growth and, levels, 99
Plasma hormones
Effects of thyrotropin-releasing hormone and a thyrotropin releasing hormone analog on growth and selected, in lambs, 139
Fetuses of lean and obese swine in late gestation: Body composition, and muscle development, 609
Plasma testosterone
And LH responses to LHRH in double-muscled bulls treated with trenbolone acetate and zeranol, 1138
PMSG, effects of
Seasonal, and number of inseminations on fertility of progestogen-treated sheep, 307
Ponies, feed intake in
Volatile fatty acids and the role of the large intestine in the control of, 815
Porcine skeletal muscle cytosol
Age-related alterations in thyroid hormone binding properties of, 1449
Pork, blood splashing in
Effects of stunning method and time interval from stunning to exsanguination on, 918
Pork carcasses
Prediction of percentage muscle in, 1392
Postmortem glycolytic rates
Electrical stimulation and carcass aging effects on beef, beef carcasses in relation to, 1456
Postweaning traits
Breed prenatal, breed postnatal and heterosis effects for, in swine, 313
Comparison of two- and three-way rotational crossing and synthetic variety production involving inbred lines of Hereford cattle:, 577
Potassium
Site of magnesium and other macromineral absorption in steers fed high levels of, 503
Prediction equation
Choice of a, and the use of the selected equation in subsequent experimentation, 1328
Pregnancy
Effects of, and lactation on the body composition of first-litter female swine, 594
Pregnancy diagnosis
In the ewe, 1
Pregnancy in the pig
Effects of dichlorvos on lymphocyte reactivity during, 1270
Presidential proclamation
National Animal Agriculture Week 1983, vi
Primal cut yield
Changes in, with increasing weight of large and small cattle, 1166
Production systems, effect of
On performance, body composition and lipid and mineral profiles of soft tissue in cattle, 1020
Profiles, lipid and mineral
Effect of production systems on performance, body composition and, of soft tissue in cattle, 1020
Progestogen
Effect of suckling on postpartum changes in 13,14-dihydro-15-keto-$PGF_2\alpha$ and, and induced release of gonadotropins in autumn-lambing ewes, 673
Pituitary and ovarian responses to gonadotropin releasing hormone, calf removal and, in anestrous beef cows, 418
Relationship between number of induced ovulations in the prepubertal gilt to the level of, and to the number of spontaneous postpubertal ovulations, 1260
Serum cortisol and, after administration of adrenocorticotropin and(or) prolactin to sheep, 1525
Progesterone concentrations
Effects of storage times and temperatures on T_3, T_4, LH, prolactin, insulin, cortisol and, in blood samples from cows, 683
Prolactin
Body growth, growth hormone, and puberty response to photoperiod and plane of nutrition in Holstein heifers, 892
Effects of ovarian secretions and dopamine on secretion of luteinizing hormone and, in ewes, 978
Effects of storage times and temperatures on T_3, T_4, LH, insulin, cortisol and progesterone concentrations in blood samples from cows, 683
Temporal patterns of growth hormone, and thyrotropin secretion in Targhee rams selected for rate and efficiency of gain, 338
Prolactin, administration of
Serum cortisol and progesterone after administration of adrenocorticotropin and(or), to sheep, 1525
Prolactin secretion
Luteinizing hormone, follicle stimulating hormone and, in ewes and wethers after zeranol or estradiol injection, 443
Protein
Condensed molasses solubles, corn steep liquor and fermented ammoniated condensed whey as, sources for beef cattle grazing dormant native range, 542
The effects of level of crude, on performance of growing boars, 364
Protein and lysine content
Effects of soil nitrogen fertility on the, and nutritional value of normal and opaque-2 corn, 1345
Protein, calcium-binding
Studies of, in cattle, 966
Protein degradation rate
Impact of weighing procedures and variation in, on measured performance of growing lambs and cattle, 1276
Protein, effects of
Phosphorus bioavailability in the chick:, source and calcium level, 1173
Protein gain
Maternal performance over three parities in rats selected for rate or efficiency of, 19
Protein levels
And monensin for growing and finishing steers, 1067
Protein source
Preservation of wet distillers grains and its value as a, for growing ruminants, 729
Protein source and lasalocid

Effect of, on nitrogen digestibility and growth by ruminants, 1537
Protein sources
Extruded mixtures of beans (phaseolus vulgaris) and soybeans as, in barley-based swine diets, 296
Protein supplements
Feather and hair meals for ruminants. II. Comparative evaluation of feather and hair meals as, 473
Protein synthesis
Growth and in vitro, in two strains of chicks, 320
Proteolytic activity
Effect of age and glucocorticoid administration on the, of gastric mucosa: A comparative study in the young rat, calf and piglet, 74
Puberty
Body growth, growth hormone, prolactin and, response to photoperiod and plane of nutrition in Holstein heifers, 892
Changes in the pituitary-gonadal axis associated with, in Holstein bulls, 433
Puberty in gilts
Influence of supplemental lighting during periods of increasing or decreasing daylength on the onset of, 1235
Puberty of heifers
Photoperiod influences age at, 985

R

Rabbits
Appraisal of nine genetic groups of, for caracss and lean yield traits, 899
Rabbits, mortality in
Breed, heterotic and diet effects on postweaning litter growth and, 1108
Rabbits, straightbred and crossbred
Characterization of, for milk production and associative traits, 1100
Doe reproduction and preweaning litter performance of, 1090
Radioimmunoassay (RIA)
Application of, for the determination of residues of anabolic sex hormones, 239
Rams, Targhee
Temporal patterns of growth hormone, prolactin and thyrotropin secretion in, selected for rate and efficiency of gain, 338
Rat
Effect of age and glucocorticoid administration on the proteolytic activity of gastric mucosa: A comparative study in the young, calf and piglet, 74
Effects of maternal dietary restriction during gestation and lactation, muscle, sex and age on various indices of skeletal muscle growth in the, 328
Rats
Maternal performance over three parities in, selected for rate or efficiency of protein gain, 19
Role of bentonite in prevention of T-2 toxicosis in, 1498
Rats, nutritional status of
Effects of low-level infections by coccidia and roundworms on the, fed an adequate diet, 1487
Rat soleus
Satellite cell and myonuclei populations in, and extensor digitorum longus muscles after maternal nutritional deprivation and realimentation, 1618
Rearing environment
The effect of, on sexual behavior of young beef bulls, 1084
Receptors, adrenergic
Role of, in mediating estradiol-17β-stimulated increases in uterine blood flow of cows, 665
Reciprocal recurrent selection
For 21-day litter weight of crossbred gilts. I. Selection applied and genetic change in reproduction of crossbred gilts, 1418
For 21-day litter weight of crossbred gilts. II. Reproductive performance of purebred females producing purebred and two-way cross litters and performance of purebred and crossbred pigs, 1431
Regression, polynomial
Analysis of repeated measurements from animal experiments using, 765
Reports from representatives, 1645
Reproductive performance
Reciprocal recurrent selection for 21-day litter weight of crossbred gilts. II. of purebred females producing purebred and two-way cross litters and performance of purebred and crossbred pig, 1431
Reproductive performance of gravid gilts
Phosphorus in swine. VI. Utilization of nitrogen, calcium and phosphorus and, fed two dietary phosphorus levels for five parities, 1463
Restricted energy intake
And elevated calcium and phosphorus intake for boars during growth. II. Foot and leg measurements and toe and soundness scores, 1182
And elevated calcium and phosphorus intake for gilts during growth. IV. Characterization of metacarpal, metatarsal, femur, humerus and turbinate bones of sows during three parities, 1200
Roundworms, coccidia and
Effects of low-level infections by, on the nutritional status of rats fed an adequate diet, 1487
Rumen fermentation
Effects of diaryliodonium chemicals on, in vitro and in vivo, 186
Rumen microbial degradation
Of Indiangrass and big bluestem leaf blades, 1626
Rumen microbial fermentation
Influence of niacin supplementation and nitrogen source on, 1576
Ruminant cold stress:
Effect on production, 1601
Ruminant heat stress:
Effect on production and means of alleviation, 1594
Ruminants
Effect of protein source and lasalocid on nitrogen digestibility and growth by, 1537
Feather and hair meals for, II. Comparative evaluation of feather and hair meals as protein supplements, 473
Feather and hair meals for, III. Relationship between enzymatic or in vitro rumen digestibility and in vivo digestibility of diets containing fea-

ther and hair meals, 483
Feather and hair meals for, IV. Effects of chemical treatments of feathers and processing time on digestibility, 495
Ruminants, growing
Preservation of wet distillers grains and its value as a protein source for, 729

S

Salmonellae, shedding of
Effect of feeding chlortetracycline or virginiamycin on, from experimentally infected swine, 279
Satellite cell and myonuclei populations
In rat soleus and extensor digitorum longus muscle after maternal nutritional deprivation and relimentation, 1618
Selenium
Effects of vitamin E and, injections on reproduction and preweaning lamb survival in ewes consuming diets marginally deficient in selenium, 553
Semitendinosis muscle development
In several strains of fetal and perinatal pigs, 1608
Serum cortisol
And progesterone after administration of adrenocorticotropin and(or) prolactin to sheep, 1525
Serum electrolytes
Effect of parenteral iron on, of the baby pig, 638
Serum ferritin
Developmental changes in, of piglets, 960
Sex
Effects of maternal dietary restriction during gestation and lactation, muscle, and age on various indices of skeletal muscle growth in the rat, 328
The effects of dietary ingredient, and slaughter weight on cooked meat flavor profile of market lamb, 1146
Sexual behavior of young beef bulls
The effect of rearing environment on, 1084
Sheep
Effect of supplemented magnesium from magnesium oxide or dolomitic limestone upon digestion and absorption of minerals in, 1545
Nutritional value and voluntary intake of tall fescue (festuca arundinacea schreb.) fed to, 1383
Serum cortisol and progesterone after administration of adrenocorticotropin and(or) prolactin to, 1525
Sheep hemoglobin
Thin-layer agarose isoelectric focusing: An improved technique for determining, type, 559
Sheep, progestogen-treated
Seasonal effects of PMSG and number of inseminations on fertility of, 307
Skeletal muscle growth
Effects of maternal dietary restriction during gestation and lactation, muscle, sex and age on various indices of, in the rat, 328
Skeletal muscle metabolism
In neonatal lean and obese pigs, 26
Slaughter weight
The effects of dietary ingredient, sex and, on cooked meat flavor profile of market lamb, 1146
Sodium bicarbonate
Influence of, and magnesium oxide on digestion and metabolism in yearling beef steers abruptly changed from high forage to high energy diets, 1561
Sodium hydroxide, effect of
Treatment of fescue-corn stillage diets on intake, digestibility and performance with lambs, 1013
Soil nitrogen fertility
Effects of, on the protein and lysine content and nutritional value of normal and opaque-2 corn, 1345
Sow
A comparison of an 8- versus 16-hour photoperiod during lactation on suckling frequency of the baby pig and maternal performance of the, 292
Sows
Effect of dietary zinc levels on health and productivity of gilts and, through two parities, 114
Sows, humerus and turbinate bones of
Restricted energy intake and elevated calcium and phosphorus intake for gilts during growth. IV. Characterization of metacarpal, metatarsal, femur, during three parities, 1200
Soybean meal
Effects of alcohol treatments on utilization of, by lambs and chicks, 511
Soybean meal, roasted
Performance of growing and finishing steers fed, 1374
Soybean products
Digestibility of nitrogen and amino acids in, for pigs, 373
Soybeans
Extruded mixtures of beans (phaseolus vulgaris) and, as protein sources in barley-based swine diets, 296
Soyflakes, raw and heated
Digestibility of nutrients in, for pigs, 1215
Spatial relationships
Matrilinear social dominance and, among Angus and Hereford cows, 1397
Spontaneous luteolysis
Growth and differentiation of large antral follicles after, in heifers: Changes in concentration of hormones in follicular fluid and specific binding of gonadotropins to follicles, 157
Steam pelleting conditions
Effects of, and extrusion cooking on a swine diet containing wheat middlings, 929
Steers
Effect of monensin on total volatile fatty acid production by, fed a high grain diet, 178
Monensin effects on digestibility, methanogenesis and heat increment of a cracked corn-silage diet fed to, 168
Plasma clearance of L- and D-lactate in, fed alfalfa hay or high concentrate diets, 1029
Site of magnesium and other macromineral absorption in, fed high levels of potassium, 503
Steers, growing
Effects of diaryliodonium chemicals on nitrogen utilization in, 195
Steers, growing and finishing
Performance of, fed roasted soybean meal, 1374
Protein levels and monensin for, 1067
Steers, yearling beef
Influence of sodium bicarbonate and magnesium

oxide on digestion and metabolism in, abruptly changed from high forage to high energy diets, 1561
Steroids
Alteration of the GnRH-induced LH release by, in postpartum dairy cattle, 1251
Stress
In farm animals: A need for reevaluation, 6
Stunning
Effects of stunning method and time interval from, to exsanguination on blood splashing in pork, 918
Sugars
The effect of gastric loads of, and amino acids on milk intake of suckling pigs, 413
Supplemental feeding
Of spring-calving cows on tall fescue or tall fescue-red clover pastures, 535
Supplement, effect of a high fat
In late gestation and lactation on piglet survival and performance, 954
Supplemented magnesium, effect of
From magnesium oxide or dolomitic limestone upon digestion and absorption of minerals in sheep, 1545
Swine
A study of the relationship between performance and dietary component digestibilities by, fed different levels of dietary fiber, 645
Breed prenatal, breed postnatal and heterosis effects for postweaning traits in, 313
Comparison of intrauterine and subcutaneous sites of estrogen injection for luteal maintenance in, 146
Effect of teat number, teat abnormalities and underline length on litter sizes and weights at 21 and 42 days in, 802
Estimates of genetic parameters for growth rate and backfat thickness of, tested to 105 and 135 kg, 879
Plasma alkaline phosphatase as a criterion for determining biological availability of phosphorus for, 396
Tiamulin feed medication for the maintenance of weight gains in the presence of mycoplasmal pneumonia in, 1474
Swine body composition
Changes in, from birth to 145 kg, 43
Swine, body composition in
A comparison of methods for estimating carcass and empty, from birth to 145 kg, 55
Swine diet
Effects of steam pelleting conditions and extrusion cooking on a, containing wheat middling, 929
Swine diets, barley-based
Extruded mixtures of beans (phaseolus vulgaris) and soybeans as protein sources in, 296
Swine field records
Genetic and phenotypic parameters estimated from Nebraska specific-pathogen-free, 1117
Swine, first-litter female
Effects of pregnancy and lactation on the body composition of, 594
Swine, growing
Efficacy of deuterium oxide to estimate body composition of, 66
Swine, growing-finishing
Ammonium polyphosphate versus dicalcium phosphate as a phosphorus supplement for, 632
Swine growth
Effects of excess arginine on, and plasma amino acid levels, 99
Swine, infected
Effect of feeding chlortetracycline or virginiamycin on shedding of salmonellae from experimentally, 279
Swine, lean and obese
Fetuses of, in late gestation: Body composition, plasma hormones and muscle development, 609
Swine, miniature
Pituitary-ovarian relationships during the estrous cycle and the influence of parity in an inbred strain of, 1517
Swine, reproducing
Evaluation of ground carcass, sawdust residue and specific gravity methods for estimating body composition of, 604
Swine, reproduction in
Valine requirement for, 1479

T

T_3
Effects of storage times and temperatures on, T_4, LH, prolactin, insulin, cortisol and progesterone concentrations in blood samples from cows, 683
T_4
Effects of storage times and temperatures on T_3, LH, prolactin, insulin, cortisol and progesterone concentrations in blood samples from cows, 683
T-2 toxicosis in rats
Role of bentonite in prevention of, 1498
Test stations, central
Factors influencing individual bull performance in, 1059
Testicular development
Breed and heterosis effects on, and endocrine function of puberal boars, 425
Tetany
Wheat pasture poisoning. I. An evaluation of cereal pastures as related to, in beef cows, 1352
Wheat pasture poisoning. II. Tissue composition of cattle grazing cereal forages and related to, 1364
Thyrotropin
Temporal patterns of growth hormone, prolactin and, secretion in Targhee rams selected for rate and efficiency of gain, 338
Thyrotropin-releasing hormone, effects of
And a thyrotropin releasing hormone analog on growth and selected plasma hormones in lambs, 139
Tiamulin feed medication
For the maintenance of weight gains in the presence of mycoplasmal pneumonia in swine, 1474
Tissue composition of cattle
Wheat pasture poisoning. II. Grazing cereal forages and, related to tetany, 1364
Tissue, subcutaneous adipose
Lipolysis in, from cattle varying in frame size and

length of time on a finishing diet, 343
Tissues, beef
Residue levels of endogenous estrogens in, 247
Trenbolone acetate
Plasma testosterone and LH responses to LHRH in double-muscled bulls treated with, and zeranol, 1138

U

Undernutrition, effects of
Of suckled pigs on subsequent growth and body composition after nutritional rehabilitation, 34
USDA yield grade
Effects of trimming external fat from beef carcasses on the accuracy of determining, 349

V

Valine requirement for reproduction
In swine, 1479
Video image analysis system
Beef carcass evaluation by use of a, 908
Virginiamycin
Effect of feeding chlortetracycline or, on shedding of salmonellae from experimentally infected swine, 279
Vitamin E
Effects of, and selenium injections on reproduction and preweaning lamb survival in ewes consuning diets marginally deficient in selenium, 553
Volatile fatty acid production, total
Effect of monensin on, by steers fed a high grain diet, 178
Vomitoxin
In corn fed to young pigs, 655

W

Weaning age of calves
Reproductive performance of Gyr cows: The effect of, and postpartum energy intake, 807
Weight gains, maintenance of
Tiamulin feed medication for the, in the presence of mycoplasmal pneumonia in swine, 1474
Weights
Effect of teat number, teat abnormalities and underline length on litter sizes and, at 21 and 42 days in swine, 802
Wethers
Luteinizing hormone, follicle stimulating hormone and prolactin secretion in ewes and, after zeranol or estradiol injection, 443
Wheat pasture poisoning
I. An evaluation of cereal pastures as related to tetany in beef cows, 1352
II. Tissue composition of cattle grazing cereal forages and related to tetany, 1364
Wheat straw diets in cattle
Effect of dietary crude protein on the dry matter digestibility of, 1568
Whey, fermented ammoniated condensed
Condensed molasses solubles, corn steep liquor and, as protein sources for beef cattle grazing dormant native range, 542

Z

Zeranol
Effects of late castration and, on feedlot performance and carcass characteristics of bovine males, 286
Growth and reproductive traits in beef heifers implanted with, 527
Luteinizing hormone, follicle stimulating hormone and prolactin secretion in ewes and wethers after, or estradiol injection, 443
Plasma testosterone and LH responses to LHRH in double-muscled bulls treated with trenbolone acetate and, 1138
Zinc levels, dietary
Effect of, on health and productivity of gilts and sows through two parities, 114
Effect of, on mineral concentration in milk, 123
Effect of, on the growth and development of the gilt, 106
